

DECISION TREE

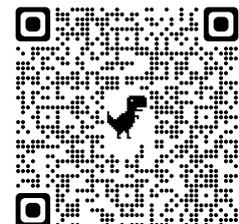

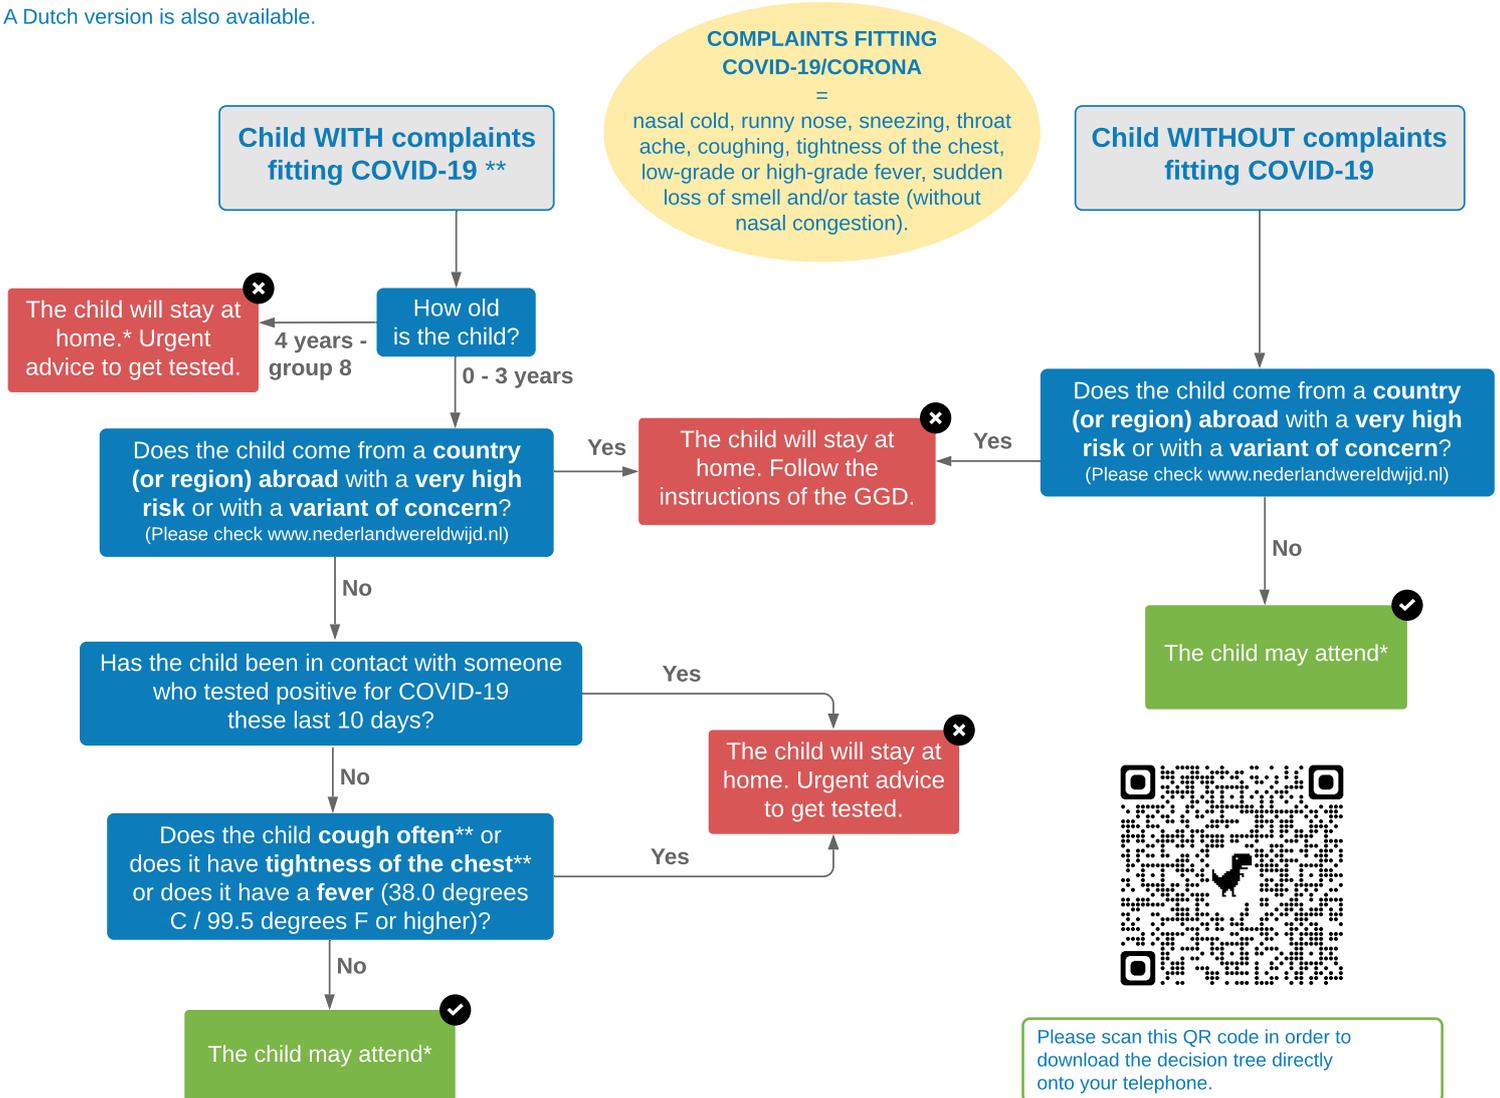

from age 0 up to group 8 primary school

By means of this decision tree you will be able to determine whether a child should or should not stay at home.

This decision tree has been developed based on the directives of the RIVM.

Before you start please note:

1. Start at the grey block that applies to the child and follow the questions in the prescribed sequence.
2. Do not just look at one or two separate questions; this may lead to an incorrect result.
3. The outcome of the decision tree is not valid for brothers and/or sisters. The decision tree has to be followed separately for each child.
4. This decision tree is regularly updated on the basis of new or renewed regulations. Please check the most recent version on www.boink.info/beslisboom.
5. A Dutch version is also available.

Please scan this QR code in order to download the decision tree directly onto your telephone.

HOW LONG SHOULD A CHILD STAY AT HOME?

Always until the end of the quarantine period set by the GGD (Municipal Health Services).

Tested?

- In case of a **positive** test result (corona virus has been found) of the child or a household member, the instructions of the GGD should be followed.
- When the child receives a **negative** test result (no corona virus) it may attend child care or school again, even if not all health complaints have disappeared yet. Unless the quarantine period set by the GGD hasn't ended yet.
- Is the child tested by the GGD, the child will stay at home until the test result is known.

Self-tests can be used. However, not to shorten the quarantine.
Check <https://www.government.nl/topics/coronavirus-covid-19/coronavirus-test>

Not tested?

A child with symptoms, such as a cough, fever or tightness of the chest that has not been tested may go to childcare/school again if it has been without complaints for a minimum of 24 hours. Have the mild symptoms been present for longer than 7 days? In that case the child may attend again. If the child has been in contact with someone suffering from COVID-19, please follow the instructions of the GGD.

* Please note

For an overview of all symptoms, see the [Protocol source and contract tracing COVID-19](#).

If you have been in contact with someone who has tested positive for the coronavirus, you should avoid contact with vulnerable or sick people for 10 days. Please also be alert to new symptoms.

**USUAL / FAMILIAR COMPLAINTS?

Do these symptoms fit in with usual/familiar health problems, such as **chronic respiratory complaints, hay fever or asthma**? In that case you may answer the questions on the right side of the tree starting with 'Child without complaints fitting Covid-19'.
